***Allowable Subject Matter***

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to motor vehicle alarm systems, and more particularly to a portable alarm that may be installed in cantilever from the cigarette lighter outlet of a motor vehicle to issue a remote alarm signal upon the movement of the vehicle. Each independent claim identifies the uniquely distinct features "the alarm system comprising a flexible beam structure deployed in cantilever and including a magnetic portion adjacent one end thereof; an electrical assembly secured to the other end of the beam structure including a tank circuit deployed in inductive proximity with the magnet portion to sense movement of the electrical assembly relative to the magnet portion". The closest prior art of Solow (US 5,469,135) and DeMaraco et al. discloses conventional vehicle security systems, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Nilsson et al. (US 6,587,047), Gillis et al. (US
